Councillor,

This is great news, thank you for the information.

Once we know more on the application process we can certainly coordinate efforts.

Regards,

Milan Vujanovic

The feds have pledged 20 million for operational costs (up to \$10,000) and the province is working on some support. We may not need to do anything other than helping businesses on how to apply.

Thank you.

Is there is a way for these businesses (and others not listed) to quantify their losses during this time? That would be the first step in at least preparing a document for higher levels of government.

Ultimately none of us know if funds will be made available by them, but this is necessary step to at least have the conversation.

Regards,

Milan.

Hi Milan, thanks for this info and follow up. I can certainly continue promoting businesses along the stretch and use the interactive map that you provided below. I was able to shoot a 2 minute video that I shared on social media thanks to the help of the Mayor's office, along with interviews with CBC and AM800 to promote the area.

With respect to a list of businesses who reached out, I have copied our Council Assistant Will Foot who helped me track the businesses who reached out and coordinated with Police to assist as well. Will, would you be able to provide Milan the list that we compiled to date?

Please let us know if you have any further ideas on a communications plan or anything else mentioned below.

Thanks again.

F

Subject: Huron Church Businesses

Hello Councillors and Rakesh,

I just wanted to bring you up to speed on some updates from Friday and over the weekend.

Shawna Boakes has indicated that they have put up "business open" signs at major intersection locations. Unfortunately, they likely cannot provide a sign for every business and/or every possible detour. I inquired if any signs were available from previous construction on Huron Church (to help identify access points and businesses) but Phong indicated that they are not.

Kirk Tamm/Allison Charko have provided the updated attached map which clearly identifies closed intersections as well as detour routes in green. There is also this link to the Municipal 511 that is regularly updated (<https://www.municipal511.ca/?lat=42.29188657369339&lng=-83.05665788524213&zoom=15&enableNewCategories=false>)

I think a coordinated communication campaign by both of you together with the Chamber (via AM800, CBC, CTV, etc.) would help inform people that businesses are still open, the detours provide access to businesses, and now, like before, supporting local businesses is critical.

With respect to business support, I have asked Rakesh to help us by compiling the below information (perhaps Councillors you already have some of this information compiled via feedback from businesses in your wards) –

- A list of the businesses affected along the corridor
- For how many days were these businesses closed completely with 0 customers/doors locked.

- Their quantifiable monetary impact/losses during the blockade and subsequent closures (daily/weekly) – Ideally this should be specifically for the blockade/closures and not the impact over the last 2 years as a result of COVID.

With this information we can work together to complete a one-pager that dimensions the impact for these businesses. We would then likely at some point present this to upper levels of government and look for them to hopefully provide support.
